A note about sources used in compiling this dictionary: Like all dictionaries, *The Surfer's Dictionary* draws on many sources. Although every effort was made to give credit for specific material, this wasn't always possible. Some definitions combine information from several sources; some terms are so widespread in their use and meaning that it would be senseless to attribute them to a single source. Nevertheless, all sources that contributed (knowingly or unknowingly) to this book are listed in either the bibliography or one of the credits sections. Concerning the editorial process followed in compiling this book, except for verbatim quotations (which are clearly indicated and attributed), all material in this book has been edited, even when the source is cited.
